

## Contributors to This Issue

**James L. Blue**, A.B., 1961, Occidental College; Ph.D., 1966, California Institute of Technology; Bell Laboratories, 1966–1979. Mr. Blue has done research in noise theory for avalanche diodes and in modeling of semiconductor devices, and was involved in the development of computer aids for testing of integrated circuits. At Bell Laboratories, he was a member of the Computing Mathematics Research Department, where he was involved in mathematical modeling, research in numerical methods, and the development of numerical software. Mr. Blue is now with the Center for Applied Mathematics, National Bureau of Standards, Washington, D.C.

**F. S. Chen**, B.S., 1951, National Taiwan University; M.S.E.E., 1955, Purdue University; Ph.D. 1959, The Ohio State University; Bell Laboratories, 1959—. Mr. Chen has worked on the development of ferrite devices, masers, and optical modulators, and is presently engaged in development of lightwave devices.

**Yu-Ssu Chen**, B.S. (Physics), 1963, National Taiwan University; M.A. (Physics), 1966, Rice University, Ph.D. (Physics), 1970, California Institute of Technology; Bell Laboratories, 1970—. At Bell Laboratories, Mr. Chen has done research in the development of magnetic bubble memory devices, silicon avalanche photodetectors, and receivers for lightwave systems. He is currently working on long wavelength photodetectors. Member American Physical Society, Sigma Xi.

**Kenneth W. Leland**, B.S., 1972, Cornell University; M.S., 1974, Ph.D. (Electrical Engineering), 1978, Duke University; Bell Laboratories, 1978—. Since 1978, Mr. Leland has been engaged in exploratory studies of single sideband as a potential modulation method for UHF mobile telephone service. His current interests include narrow-channel digital mobile telephone systems. Member, IEEE.

**J. E. Mazo**, B.S. (Physics), 1958, Massachusetts Institute of Technology; M.S. (Physics), 1960; Ph.D. (Physics), 1963, Syracuse University; Research Associate, Department of Physics, University of Indi-

ana, 1963-1964; Bell Laboratories, 1964—. At the University of Indiana, Mr. Mazo worked on studies of scattering theory. At Bell Laboratories, he has been concerned with problems in data transmission and is now working in the Mathematical Research Center. Member, American Physical Society, IEEE.

**Gary K. McNees**, B.S.(E.E.), 1960, University of Missouri, School of Mines and Metallurgy; M.S.(E.E.), 1962, New York University; Bell Laboratories, 1960—. Mr. McNees has been concerned with characterization of performance of the telephone network. He is presently engaged in local transmission access studies. Member, Tau Beta Pi, Phi Kappa Phi, Eta Kappa Nu, IEEE.

**Larry Ozarow**, B.S. (Electrical Engineering), 1970, Columbia University; Sc.M., 1973, and Ph.D. (Electrical Engineering), 1979, Massachusetts Institute of Technology; Bell Laboratories, 1979—. Mr. Ozarow is engaged in research in the area of multiple user information theory. Member, Tau Beta Pi, Eta Kappa Nu.

**Nelson R. Sollenberger**, B.S. (Electrical Engineering Technology), 1978, Temple University; Bell Laboratories, 1979—. Mr. Sollenberger has been engaged in exploratory studies of single sideband as a potential modulation method for UHF mobile telephone service. Member, IEEE.

**Uzi Timor**, B.S. (Electrical Engineering), 1957, M.S. (Electrical Engineering), 1963, Technion, Israel Institute of Technology, Haifa, Israel; Ph.D., 1969, University of California, Berkeley; Member of the Technical Staff, Jet Propulsion Laboratory, Pasadena, California, 1969-1972; Adjunct Faculty (Electrical Engineering), Technion, Israel Institute of Technology, Haifa, Israel, 1972-1979; Bell Laboratories, 1979-1980; Armament Development Authority/Israel Ministry of Defence, 1959-1966, 1972—. At Jet Propulsion Laboratory, Mr. Timor was engaged in research in digital communications and coding. At Bell Laboratories, he was a consultant working in digital communications and mobile radio. Member, IEEE, Eta Kappa Nu.

**Robert E. Warren**, A. B., Bowdoin College, 1966; B.S.C.E., Columbia University, 1966; M.S.E.M., Stanford University, 1967; Bell Laboratories, 1967—. Mr. Warren is currently engaged in developing central office layouts, plan algorithms, and cable distribution systems for digital transmission offices. Member, Phi Beta Kappa, Tau Beta Pi.
